Outstanding units - Class CAV	664	QTY

**Information on the asset valuation method**

For assets admitted to trading on an exchange or admitted to or included in another organised market, pursuant to § 27 KARBV, the last available tradable price that ensures a reliable valuation is used as a basis. For assets that are neither admitted to trading on exchanges nor admitted to or included in another organised market, or for which no trading price is available, pursuant to § 28 KARBV in connection with § 168 (3) KAGB, fair values are based on careful assessment using suitable valuation models, taking current market circumstances into account. The underlying fair value may also be determined and communicated by an issuer, counterparty or other third party. In this case, this value is checked for plausibility by the management company or the custodian and this plausibility check is documented. Units in domestic investment funds, EC investment units and foreign investment fund units are valued at their last determined redemption price or at a current price in accordance with § 27 (1) KARBV. If current values are not available, the value of the units is determined in accordance with § 28 KARBV; reference is made to this in the annual report. Bank deposits are valued at their nominal value plus accrued interest. Fixed-term deposits are measured at fair value. Liabilities are recognised at their repayment amount.
